

PLENUM

USB EXTENDER CABLE

49 Foot USB 2.0 Compliant

USB specifications limit connections to a maximum run of only 15ft. This can make placement of USB devices difficult, especially when longer runs are required. Covid USB Extender Cable eliminates the USB length constraint allowing for extended USB connections.

Features

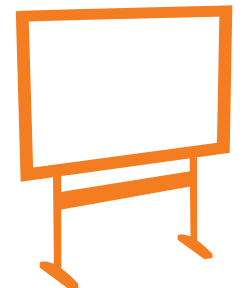

- No external power required
- USB A Male to USB A Female
- USB 2.0 compliant up to 480mbps
- Backward compatible with USB 1.0 standards
- Combine up to (3) cables together for 3 times the length
- It's plug-and-play, no additional drivers required
- Available in 32ft. and 49ft. lengths

Combine Up To (3) Extender Cables
