

Safely install cables assemblies with the Cleerline SSF-PULLEYED Pulling Eye Kit.

The SSF-PULLEYED is intended for use with simplex or duplex cable assemblies. It can also be utilized with Active Optical Cables (HDMI, DisplayPort, or USB), provided the connector head fits within the mesh sleeving.

This kit also incorporates PVC-jacketed aramid yarns as the strength member. The pulling eye's clip rotates, helping to decrease twisting.

The SSF-PULLEYED allows easy cable installation in walls or in conduit.

This kit can be reused. Simply remove the tape used during installation and attach the kit to a new cable.

SSF-PULLEYED

FEATURES AND BENEFITS

- Sized for use with simplex, duplex, or Active Optical cables (HDMI, DisplayPort, USB)
- Protects cable assemblies for installations in wall or in conduit
- Easy attachment

COMPATIBLE CABLES INCLUDE
