

# 4K HDBaseT HDMI, USB, WP to Box

Extend full 4K 60Hz HDMI signals at 18Gbps up to 132ft (40m)

Covid's HDBaseT transmitter can be used in any professional or educational video application to extend video, audio and USB signals from sources to displays, speakers or other audio-visual devices.

## Why Use Covid's HDBaseT Kit?

**4K HDBaseT Signal Extension:** This HDBaseT kit is capable of transmitting HDMI and USB over Cat 6/6a up to 132ft at 4K60Hz and 328ft at 1080P.

**Compact Product Bundle:** With just the decora transmitter wall plate and the small receiver box you get all the features this amazing product has to offer.

**Versatility:** While the EHB-250-W is the perfect product for classrooms, it can also be used in many other applications including conference or meeting rooms.
