

Active HDMI 2.0 Cable

Supports 4K 60Hz up to 50 feet

4K UHD

Why Use This HDMI Cable?

Distance: Covid's Active HDMI Cables have built in circuitry allowing for much longer cable runs. These cables are available up to 50ft using the HT8181 chipset.

Flexibility: Utilizing a smaller 28AWG (25ft & 35ft only) gauge size allows for tighter bend radius and ease of installation.

Cost: These cables use less copper making them less expensive than larger gauge cables. In addition, lighter weight equals less shipping cost.

Covid Part Number

HD2-XXR

Specifications

- Non-Plenum
- Resolutions up to 2160p@60Hz (4K - 18G)
- Distances up to 50ft
- Compatible with HDMI 2.0 standard
- Available lengths: 25ft and 35ft (28AWG), as well as 50ft (24AWG)
- Active circuitry built into cable
- Covid gold plated T-Grip connectors
- Durable, Molded Connectors
