

24AWG HDMI Cables

HDMI Cable with Ethernet, 24 AWG Construction

Why Use This Covid Cable?

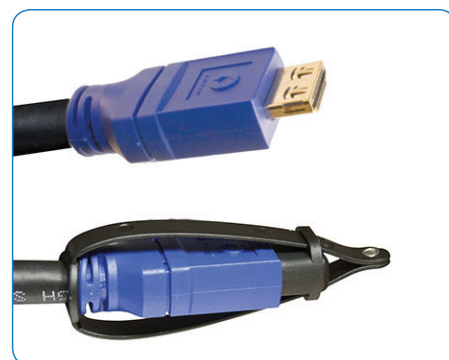

Distance: Covid's 24 AWG HDMI Cables allow for longer cable runs at higher resolutions than smaller gauge cables. These cables are available up to 50ft.

Easy Installation: These HDMI cables are shipped complete with Covid's Spear-Head Pull System, placing pull stress on the cable strain relief instead of the connector.

Secure Connection: The Covid T-Grip connectors offer a more secure connection, holding the cable firmly in place.

Specifications
