

LUXi[®]
Electronics

HDMI Extender[™]

Double the maximum usable HDMI cable length

Why you need it:

- All HDMI cables have length limitations
- The max usable length depends on signal type, cable performance, source drivability and display sensibility/error correction capability, thus not predictable
- Signal bandwidth increases over the years; the previously working HDMI cables may not work now

Features and benefits:

- World's smallest HDMI Extender
- HDMI 2.0 32 audio ch., 1536 kHz sampling, dual video stream, multi audio stream, 21:9 aspect, dynamic AV sync, CEC extensions, 3D, HEAC, compliance
- Virtually doubles the maximum usable HDMI cable length
- No mounting needed; just plug it in-line between the cable from the source device and the sink device's input
- No external power supply needed; it draws power from the source device
- Luxi patented T-grip[™] locking HDMI connector design on both male input and female output ensuring secure connector mating
- Luxi SuperSlim[™] HDMI connector and thin cable fit in the tightest spaces
- Installers can resolve virtually any HDMI system issues by always carrying Luxi HDMI Extenders and Communicators in their tool cases

Product name	Model number	Part number	Availability
